

# Friday

### Just a few...

Let's have some fun with WEB 2.0 this week. Some of the ideas are new to Friday Five. Some have just been forgotten.

1. **Tizmos**: Tizmos is a personalized homepage that allows you to see thumbnails of your favorite sites (tizmos) all in one place. You can add, edit, and delete Tizmos on your page.

<http://www.tizmos.com/>

2. **Edisco**: Edisco is a flashcard tool. When Ediscio is used in the classroom, it will make your pupils create their learning material cooperatively. They have the opportunity to help and correct each other. The powerful learning system of Ediscio will help them find out their personal learning focus. For a teacher, Ediscio's automatic logging feature makes it easy to supervise, correct, and give advice, if needed.

3. **HotPotatoes**: The Hot Potatoes suite includes six applications, enabling you to create interactive multiple-choice, short-answer, jumbled-sentence, crossword, matching/ordering and gap-fill exercises for the World Wide Web. Hot Potatoes is freeware, and you may use it for any purpose or project you like.

4. **Gliffy**: With Gliffy online diagram software, you can easily create

professional-quality flowcharts, diagrams, floor plans, technical drawings, and more

<http://www.gliffy.com/>

5. **Thoughts to ponder**: The great trouble with most men is that those who have been educated become uneducated just as soon as they stop inquiring and investigating life and its problems for themselves.

~ Newton Diehl Baker

Have a great and productive summer!!!
